THE 9<sup>TH</sup> INTERNATIONAL THAI COSDERM CONGRESS ON AESTHETIC MEDICINE

## POST CONGRESS CADAVER COURSE DAY 1 SATURDAY MAY 25

Faculty of Medicine, Chulalongkorn University, Bangkok

### "CADAVERIC DEMONSTRATION AND DISSECTION ON TOXIN AND FILLER INJECTIONS" AND THREAD LIFT

This course is provided for aesthetic physicians for full face approaches in toxin and filler injection and Thread Lift. The safest and latest techniques of filler and toxin injection and Thread Lift will be elaborated

Cadaveric dissection will be performed layer by layer with clear explanation to understand the important structure of each layer including the red alert zone of serious complication

After completion of Hands-on Cadaveric Course, the attendees should be able to do the following objectives.

- Understanding the correlated facial aging anatomy and morphology
- Understanding the surface and functional facial anatomy
- Understanding the essential anatomy for facial cosmetic surgery and injection
- Understand how to perform hyaluronidase, the retrobulbar, supratrochlea and supraorbital injection
- Understand proper injection technique, safe entry point and depth of injection
- Identify safe and danger zone

Prof. Hee Jin Kim (Korea), Prof. Tanvaa Tansatit (Thailand)

- Anatomy Review : Important Face and Neck Anatomy for Injection and Cosmetic Surgery
- Understanding layer anatomy and its importance in face and off face (neck and hand) rejuvenation
- Understanding vascular anatomy and its variation : what's important to know before injection
- Fat pad and its importance in aging anatomy and aesthetic injection
- SMAS, retaining ligament and its importance in aging anatomy and aesthetic injection
- Red Alert zone for vascular incident
- Anatomy Review on New Report of Filler Complication : Possible Pathogenesis

Wilai Thanasarnaksorn (Thailand), Atchima Suwanchinda (Thailand), Francesca De Angelis (Italy), Paisal Rummaneethorn (Thailand)

- Surface anatomy, important landmark and cadaveric injection, thread treatment and dissection
- Forehead, periorbital area, glabella, temple, nose, mid face, perioral, lip, chin, underchin, neck, hand : Safe step by step injection technique and how to avoid complications technique
- Retrobulbar, Supratrochlea and Supraorbital, Hyaluronidase Injection
