### GENERAL COURSE DESCRIPTION

Since 2010, "ITCAM Hands-on Cadaver Dissection Courses" has been an outstanding platform for highly professional training on soft cadaver, for aesthetic surgery on filler and toxin injection and minimally invasive procedures for aesthetic practitioners. During our 2-days Cadaver Courses, first day there are live surgery and lectures focusing on pitfalls of unfavorable results and complications of injection. Clinico-anatomical correlation will be demonstrated to show the mechanism and pathobiology of complications. Live show how to do it correctly together with simultaneous cadaveric demonstration. Second day, hands-on cadaveric demonstration will be performed and hands-on injection and dissection on your own with step by step with personal guidance from our experienced team. The Retrobulbar and peribulbar hyaluronidase injection will be demonstrated.

### ANATOMY TRAINING CENTER

The technically highly advanced CHULA SOFT CADAVER Surgical TRAINING CENTER of Chulalongkorn University has been inaugurated since 1996. The venue guarantees the best standard for a soft specimen dissection training center in Asia.
